## Summary

I am a fourth-year Ph.D. student in Applied Economics at Ohio State specializing in the intersection of regional and energy economics. My research applies spatial equilibrium and related regional frameworks to energy markets, with a current focus on residential energy consumption and building construction. I am broadly interested in how regional economic forces including urban form, land use, and infrastructure shape energy systems and carbon outcomes. I am seeking opportunities to extend this agenda into electricity pricing and market design.

## Education

### The Ohio State University

Columbus, OH

PhD (MS earned in 2025) in Agricultural, Environmental, and Development Economics

August 2022 - Current

- **Graduate Teaching Assistant:** Grade and assist in the execution of courses in undergraduate economics
- **Instructor of Record:** Environmental and Resource Economics, Summer 2026
- **Research Assistant:** Researched and assisted with the preparation of a report on the voluntary carbon market, presented to corporate stakeholders
- Wrote or co-wrote two papers so far, with additional to come
- **Coursework Foci:** Advanced Quantitative Methods (focusing on dynamic/structural modeling), Econometrics, Microeconomic Theory, Regional and Environmental economics

### University of Illinois Urbana-Champaign

Champaign, IL

Supplementary Math Course in Linear Algebra

September 2021 - January 2022

### Wheaton College

Wheaton, IL

Bachelor's of Arts in Economics

August 2015 - May 2019

- **Certificate:** Human Needs and Global Resources: a program that integrates multidisciplinary coursework, a six-month international internship, and experiential learning
- Conducted an independent research project analyzing mushroom production amongst farmers as partially explained by specialization, in which I used Stata software and Excel to collect and clean a panel dataset to analyze specialization over time as cooperative membership grows
- **Minor:** French Language and Culture
- **Other Distinctions:** 3.66 GPA, Recipient of Blanchard Presidential Merit Scholarship, graded for an Economics of Growth and Development class

### Congress-Bundestag Youth Exchange Program

Berlin, Germany

Exchange Student

September 2014 - July 2015

- Recipient of a scholarship sponsored by the United States Congress and the German Bundestag, programmed by AFS

## Work Experience

### Epic Systems

Verona, WI

Technical Services

January 2020 - September 2021

- Managed ongoing software maintenance and client relationships for billing IT teams for three large hospital organizations
- Researched and troubleshooted software defects in financial modules for Accounts Receivable/General Ledger/Billing
- Developed custom reports using data from Epic databases for client use
- Worked collaboratively on integrated issues with related applications and operational, financial, IT, and project management teams

### Hungry World Farm

Tiskilwa, IL

Farm Finance Analyst

May - October 2019

- Analyzed finances of farm programs to plan planting and expansion, and improve farm operations on a business level
- Built data collection systems for labor costs and sales outputs, particularly integrating data entry forms with workflows

### World Hope International Cambodia

Phnom Penh, Cambodia

Business Operations Analysis Intern

May - December 2018

- Worked with a farmer's cooperative social enterprise moving towards being a self-sustaining project, and analyzed accounting data to smooth and predict production with the goal of streamlining systems and standardizing workflow, including data management
- Accompanied operations team for product sales/purchases to gain an understanding of product sales and purchase systems
- Developed business strategy and made decisions collaboratively, using analytical problem-solving skills
